

## Experiment: Arithmetic operation

echo Enter the a value  
read a

echo Enter the b value  
read b

echo 1. Addition

echo 2. Substraction

echo 3. Multiplication

echo 4. Division

echo 5. Modulus.

echo Enter your choice

read choice

case \$choice in

1) echo Addition : \$(expr \$a + \$b);

2) echo Substraction : \$(expr \$a - \$b);

3) echo Multiplication: \$(expr \$a \\* \$b);

4) echo Division : \$(expr \$a / \$b);

5) echo Modulus: \$(expr \$a % \$b);

~~echo~~

\*) echo This is not a choice
